Outline

Introduction

Motivation

Methodology

Experiment

Conclusion

- Among all industries, construction has seen a significant productivity decrease over the last several decades (Rojas, 2003).

- Among all industries, construction has seen a significant productivity decrease over the last several decades (Rojas, 2003).
- **Construction has also been documented to have some of the highest rates of workspace injuries and fatalities** (Bureau of Labor Statistics, 2012).

- Among all industries, construction has seen a significant productivity decrease over the last several decades (Rojas, 2003).
- Construction has also been documented to have some of the highest rates of workspace injuries and fatalities (Bureau of Labor Statistics, 2012).
- **Automation and robotics in construction (ARC)**
 - Has potential to relieve human workers from repetitive and dangerous tasks;
 - Has been extensively promoted in the literature as means of improving construction productivity and safety (Balaguer, 2004).

- Unlike *manufacturing* industry, *construction* industry is still exploring feasible and broadly deployable ARC applications.

- Unlike *manufacturing* industry, *construction* industry is still exploring feasible and broadly deployable ARC applications.
 - Commercial challenges
 - fragmented and risk-averse nature
 - little investment in ARC research

Autonomous Onsite Assembly (16x speed)

Feng C., Taguchi Y. and Kamat V.R. **Fast Plane Extraction in Organized Point Clouds Using Agglomerative Hierarchical Clustering.** *In Proceedings of the IEEE International Conference on Robotics and Automation (ICRA), 2014.*

- Two major technical challenges for ARC
- The reported algorithms and an implemented robotic system
 - automatically generate building plans from computational architectural designs
 - achieve these plans autonomously on construction sites
- A computer-vision-based sub-centimetre-level metrology

- Continuously improving this system:
 - 3D perception
 - autonomous navigation
 - Improve control algorithms
 - more complicated assembly tasks
 - ...

Autonomous Onsite Assembly (16x speed)

Thank you! Any questions?

Chen Feng (in Chinese: 冯晨)
